SUMMARY

I am a student in my final year of studying Software Engineering. I am interested in developing web applications, artificial intelligence, and machine learning, as well as developing WordPress pages. I speak English fluently and have broad interests in technology fields including tech economicsاIn general, I am fond of automation and its inclusion in all areas of life

EDUCATION

B.S. Software Engineering
University of albaath, homs
📅 2017 - Present 📍 syria-homs

GPA
3.2 / 4.0

EXPERIENCE

Python Developer
Freelancer
📅 2020 - Present 📍 freelancing

- As a developer, I have worked on another project involving analyzing stocks and financial markets using various statistical and machine learning techniques. This led me to create a simple web application that includes a control panel for analyzing financial data and predicting trends. Thanks to this experience, I am capable of developing advanced applications for financial data analysis using machine learning techniques, convolutional neural networks,I have experience working with various time series analysis techniques such as moving averages, exponential smoothing, ARIMA (Autoregressive Integrated Moving Average), and seasonal decomposition of time series. Additionally, I have worked on forecasting models for time series data using machine learning algorithms such as LSTM (Long Short-Term Memory) and Prophet.

Web Developer
focal x agency
📅 08/2022 - 01/2023 📍 lattakia-syria

- I have worked on fundamental web development technologies such as HTML, CSS, JavaScript, and PHP, as well as frameworks like React and Laravel. The main focus of my work was converting static designs from Figma into a functional web application, including the implementation of APIs

Web Developer
Freelancer
📅 2021 - Present 📍 remotely

Company Description
- according to my experience as a freelancer in web development, I have developed several websites using technologies such as WordPress, HTML, CSS,React and JavaScript. I have also integrated WordPress with React by exporting the API from WordPress. This experience has enabled me to develop advanced web applications and websites using modern development technologies.

SKILLS

Programming

| Python | pandas | NumPy | Matplotlib |

| Flask | keras | scikitlearn | SQL |

| beautifulsoup | scrapy | selenium |

| sqllite | php | tensorflow | Html&css |

| streamlit | wordpress |

Development

| GIT | Jupyterlab | vscode | PyCharm |

STRENGTHS

🕐 **Time management**
Prioritizes essential tasks so they are not rushed. Sets deadlines that ensure reaching milestones on time.

⚙ **Adaptability**
I remember that change is not personal and is inevitable. I break my projects into multiple parts so that if something goes wrong, I can quickly fix it.

🧠 **Critical thinking**
Analyze information systematically and systematically, evaluate arguments and evidence and make decisions based on logic and data

VOLUNTEERING

web developer
Tedxaldablanstreet
📅 09/2022 - 2022

I worked with a team to develop a website for the tedxaldablanstreet event, which included a description of the event as well as a professional gallery of speakers and attendees
